

SHATHA OBEIDAT

Software Engineering | Al-Balqaa Applied University

+962-782725807

shathaobiedat62@gmail.com

Amman, Jordan

PROFESSIONAL SUMMARY

Software Engineering graduate with a solid foundation in software development principles and problem-solving. Seeking a challenging internship to apply academic knowledge to real-world projects and contribute to building innovative software solutions within a professional team, while staying committed to continuous learning and skill development.

TECHNICAL SKILLS

Languages: Java, C++, html, css, javascript

Frameworks: spring boot, spring mvc, spring data JPA, spring security

Databases: MySQL

Tools: Git , GitHub, IntelliJ IDEA, VS Code,postman

Concepts: OOP, Data Structures & Algorithms, Microservices, Dependency Injection

MVC Architecture, JPA/Hibernate, Exception Handling, Validation

Soft Skills: Team Collaboration, Debugging & Testing, Analytical Thinking, Ownership Mindset, Attention to Detail, Adaptability

Projects

Project Flow – Collaborative Project & Task Management System

Technologies: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, MySQL, Maven, REST APIs, JWT, Git, GitHub

Designed and developed a scalable backend REST API for a collaborative project and task management platform.

Implemented secure authentication and role-based authorization using Spring Security and JWT.

Designed a relational database with JPA/Hibernate to manage users, teams, projects, tasks, comments, and attachments.

Built RESTful APIs following layered architecture (Controller, Service, Repository) with DTOs and validation.

Implemented task assignment, priority management, status tracking, deadlines, and project collaboration features.

Applied global exception handling, input validation, and clean code principles to ensure maintainability and reliability.

Documented and tested APIs using Postman and Swagger/OpenAPI.

Managed the project using Git and GitHub with a structured commit history and feature-based development workflow.

TRAINING

Competitive Programming Trainee | ACM Summer Training — University of Jordan

Summer 2024 Amman, Jordan

- Completed intensive algorithmic training covering graph theory, dynamic programming, and advanced data structures, strengthening problem-solving speed and accuracy under time constraints.
- Practiced 300+ competitive programming problems on Codeforces, reflecting consistent algorithmic skill development.

Programming Trainee | Training Program – Al Balqaa Applied University

- • Completed structured programming training covering fundamental programming concepts, including variables, control flow, loops, functions, arrays, and Object-Oriented Programming (OOP).
- • Solved hands-on coding and logic problems, strengthening problem-solving, algorithmic thinking, and debugging skills.
- • Developed and tested small programming tasks and exercises, applying theoretical concepts to practical coding scenarios.
- • Collaborated with fellow trainees during technical exercises, improving communication, teamwork, and knowledge-sharing skills.

EDUCATION

Bachelor of Software Engineering | Al-Balqa Applied University

Relevant Coursework: Data Structures · Object-Oriented Programming · Database Design & Management · Object-Oriented Software Engineering · Web Applications & Services · Software Requirements Engineering · JAVA Programming

GPA : 3.66 (Excellent)

LANGUAGES

Arabic: Native **English:** Professional Working Proficiency
